SUMMARY

Front-End Development graduate with a solid foundation of skills in HTML, CSS, JavaScript, responsive design and best practices. Bringing a background in leadership and team work from operations roles, and now fully focused on applying technical knowledge to build user-friendly digital experiences. Motivated, quick to learn, and eager to contribute to a development team that values modern practices and high standards.

PROJECTS (FRONT-END COURSE)

Personal Portfolio Website

- This portfolio is an ongoing project where I demonstrate my front-end development skills. It includes sections such as Home, About, Skills, Projects and Contact. The design is responsive and interactive, and I plan to keep improving it as I learn new techniques and technologies in my course. The technologies used for this project were: HTML and CSS.

Local Business Café

- A responsive and modern website designed for a fictional local café. This project focuses on promoting the café's menu and services, featuring sections for coffee, drinks, and breakfast options. The site will include an intuitive layout, mobile-friendly design, and interactive elements to engage users and support the café's online presence. The technologies used for this project were: HTML, CSS and JavaScript.

Online Quiz

- An interactive and responsive quiz application designed to make learning fun. This project features randomized questions across categories such as General Knowledge, Science, Sports, and Movies. Users can track their progress, view high scores, and enjoy a clean, mobile-friendly interface with engaging visuals. The technologies used for this project were: HTML, CSS and JavaScript.
-

WORK EXPERIENCE
